CAREER OBJECTIVE

As a 2+ experienced software engineer with a passion for software development, my career objective is utilizing technical expertise for software planning, and successful product delivery. Driving innovation, cross-functional collaboration, and market-driven product development.

KEY SKILLS

- **Languages**: Python, C, JavaScript and SQL
- **Frameworks**: Django, Flask, FastAPI, ReactJS, NodeJS and Django Rest Framework
- **Databases**: MySQL, PostgreSQL, MongoDB and SQLite
- **Tools**: Kubernetes, Docker, GIT, Power BI(Data Visualization)
- **Soft Skills**: Communication skills, Leadership and Time Management Skills
- **Cloud Services**: Azure, Google Cloud Platform and Serverless Computing

Professional Experience

Decision Point
Software Developer   **JUN 2022 -Current**

- Spearheaded the end-to-end development of an ETL pipeline designed to efficiently process and segregate millions of data points generated by a third-party source. This pipeline effectively preprocessed the data and seamlessly inserted it into Google BigQuery, **facilitating comprehensive data analysis and insights generation**.
- Conducted in-depth exploration and evaluation of Facebook Workplace, MS Bot Framework, and Graph API to assess their **potential integration into the product**. These investigations, driven by a focus on future enhancements, provided valuable insights and paved the way for potential product expansion and improved user experiences.
- Developed a cloud-to-cloud API interface, enabling seamless communication and data sharing between different cloud platforms.
- Built a proof-of-concept platform showcasing the capabilities of analytics-driven chatbots for **Coca-Cola company**. This platform, developed using technologies such as **Django, Python and Facebook Graph API,** demonstrated the value of integrating chat bot technology into enterprise environments, particularly for data-driven decision-making.
  Implemented a Cards library for an analytics chatbot named AskSales for Sales Data for different regions and SKUs for different customers, resulting in significant time savings and enhanced customization capabilities

Ongraph Technologies Pvt. Ltd.
Software Developer   **APR 2022 – JUN 2022**

- Successfully worked on the end-to-end development of a KredX Project for Client's trading data and create many APIs for showcasing the Clients data to KredX website.
- This APIs, developed using technologies such as Python, Django and Django Rest Framework.
- Integrate API to ReactJS Application using axios and fetch.
- Developed secure and high-performing APIs that facilitated seamless integration between systems, contributing to **enhanced data exchange and overall product functionality.**

EIS Labs Pvt. Ltd.
(Software Intern + Developer)   **JUL 2021-APR 2022**

- Worked on a Stock Trading Website which extracts the stock trading data from Zerodha API for our Client's Requirement .
- Create APIs for extracting the useful data driven insights. This API, developed in FastAPI and Python.
- Create behavior driven test cases.

EDUCATION

Rajasthan Technical University, KOTA   2018-2022
Bachelor of Technology, Information Technology – 8.5 SGPA
